

**Stonehill Community  
Architectural Committee Meeting  
May 15, 2011**

Attending: The May Architectural Committee business was held via email. The following results are compiled from feedback received from those Architectural committee members who responded.

**Requests**

**862 - Replace two garage doors and hardware.**

Work will be done by Overhead Door Company of Dubuque. If it can be installed before May 27, the owner can save some money plus they will haul the old doors away free.

I have talked with the homeowner. The garage doors are the approved model and the color is the same color she currently has which is an approved color.

**The committee recommends approval.**

**870 - Install a new storm door.**

I have talked with the homeowners and they will install a storm door which was previously installed on their daughter's unit at 888. This door is an approved model having been approved in the past.

**The committee recommends approval.**

Darlene Conzett,  
Chairperson, Architectural Committee
